	Examiner Cephia D. Toomer	Art Unit 1714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is not clear what is meant by the terms "an elevated temperature". This language encompasses any temperature above room temperature. Clarification is required.

In claim 1, it is not clear what is meant by the terms "a target temperature." Can any temperature lower than the elevated temperature be the target temperature? Clarification is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1714

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Viall (US 6,090,171).

Viall teaches a stabilized thermally beneficiated low rank coal and method of manufacture. The method comprising preheating coal in a moving packed bed, oxygenating the coal with air (gas streams with slightly reduced oxygen concentrations) and cooling the coal (see abstract; column 6, lines 5-12, 28-31; column 7, lines 40-45). Viall teaches that the coal is heated at a temperature of 140-350⁰ F, and oxidizes at a temperature of 140-250⁰F and that about 1.0-1.5% oxygen by weight will be absorbed into the coal (see column 5, lines 66-67; claim 1; column 6, lines 20-24).

Viall teaches the limitations of the claims other than that the carbonaceous material is cooled before it is oxidized. However, the selection of any order of performing process steps is prima facie obvious in the absence of new or unexpected results. In re Gibson, 5 USPQ 230 (CCPA 1930); MPEP 2144.04 IV C.
